

# Uniting Global Scientific Research: Efforts to Tackle Climate Change.

## ➤ **Description, objectives, and target outcomes of the session:**

This session will set the stage for representatives from parties, civil society, international organizations, observers, and all other stakeholders to showcase how science can unite our global efforts against the existential threat of climate change. The session will bring together the latest climate science-related findings and focus on developing a global scientific hub for climate change research. Speakers will assess how academic institutions were successful in developing partnerships in climate research and what is needed to harmonize efforts to advance collaboration in implementing research findings, to efficiently move from negotiation to implementation of scientific results to collectively take a path towards sustainability that would significantly facilitate the realization of environmental goals.

## ➤ **Session format: panel discussion.**

## ➤ **Date and Time: 10th of November 2022, 10:00- 10:50.**

## ➤ **Thematic day: Science day.**

## ➤ **Venue: Room P20 – Blue Zone.**

## ➤ **Speakers:**

- H.E. Ayman Ashour, Minister of Higher Education and Scientific Research.
- Jim Skea, IPCC.
- Jeffery Sachs, Director, Center for Sustainable Development, Earth Institute, Columbia University.
- Alex Halliday, Founding Dean, Columbia Climate School, Columbia University.
- Sheela Patel Led the development of the coalition Adaptation Research Alliance. (Moderator)
