

COLUMBIA CLIMATE SCHOOL

Executive Education

Our mission is to provide transformative learning opportunities, deepen knowledge, and educate current and future leaders to navigate the complex challenges of a changing climate and its impacts.

WHY COLUMBIA CLIMATE SCHOOL

- Designed to be relevant, cross-cutting, rigorous, novel, and ethical.
- Taught by unparalleled experts with extensive knowledge of climate change and its application across various sectors of society.
- Presented with translational research for applied practice.
- Customized and tailored to meet the needs of companies, industry groups, non-profits, and other organizations.

We're at an inflection point—and the world needs problem solvers. Tackling the immense challenge of climate change requires all of us, across the entire population, to build knowledge, think creatively and act decisively.

- **Alexis Abramson**, Dean, Columbia Climate School

OFFERINGS

Education and training are specifically tailored for different audiences along their educational journey.

Customized Executive Education

Programs can be customized in the context of each organization's scope and mission. It is customized, designed, and delivered to build knowledge and hone skills. These programs have been implemented in the private, public, and nonprofit sectors.

Professional Learning Workshops

Columbia Climate School's Professional Learning Workshops offer working professionals the chance to learn and enhance targeted skills in the areas of climate and sustainability, empowering them to advance their careers and drive meaningful change. Open enrollment workshops cover an array of topics, and are targeted at working professionals.

PROGRAM FORMATS

In-Person Training	Single or multiple topics taught by instructors and researchers presenting topics based on expertise and optimized in collaboration with the hosting organization to address their business areas.
Live-Virtual Training	These programs provide the opportunity to interact in real-time with instructors, while allowing the flexibility to participate from anywhere in the world.
Hybrid Training	Hybrid options provide the best of both worlds, allowing the richness of in-person teaching, with options for participation for remote offices, or those that otherwise can not participate in person but still seek to learn from the educational sessions.

EDUCATION AND TRAINING OFFERINGS

Topics covered in these trainings include:

- Biodiversity
- Cities, Climate and Sustainability
- Climate Adaptation and Disaster Resilience
- Climate Communications
- Climate Finance
- Climate Litigation and Corporate Accountability
- Climate Science and Climate Change Impacts
- Company Disclosures and Corporate Challenges
- Emerging Technologies in Climate Change and Climate Analytics
